CHROICLE ADA LOVELACE

THE FIRST PROGRAMMER AND THES WOMAN WHO SAW THE FUTURE

ADA LOVELACE fue born in 1815 in London, She was the daughter of the famous poet LORD BYRON and a Brilliant woman, ANNABELLA MIBANKE. From a Young Age, Ada loved mathematics and science, which, was very unusual for women in her time. Her mother encouraged her to study logic and numbersto balance her imanation.

As an adult, Ada met Charles Babbage, a mathematician and invertor who was working on a Project called the Analytical Engine. A mechanical thatcould make complex calculations. Ada Became fascinated by his ideas and decided to translate an article a bout his invention. While doing so, she added long and detailed notes xplaining hoiw the machine could be programmed to persorm many operations automatically.

In her notes, she described the first algorithm aver written a methaod that told themachiwhat to do step by step.For that resason , ADA LOVELACE IS RECOGNIZED AS THE WOLD´S FIRST COMPUTER PROGRAMMER.

Sheal al so imagined tha such mschins could créate music and art not just solve equations.

Today, Ada Lovelace is admired as a visionary womannwho changed the history of technology. Her legcy continues to inspre scientis, engneers and especially women who work in STEM fields. Ada Lovelace proved that imagnation and intelligence can work together to shape the future. And her dream of intelligent machines in now a reality in our modern wold.

Ada Lovelace died die don 1852, in London she died of uterine cáncer.
